SUMMARY

Passionate and versatile **Junior .NET Developer** with 1 years of hands-on experience building scalable web applications, RESTful APIs, and enterprise solutions. BSCS graduate and Google Certified Cybersecurity Professional specializing in C#, .NET Core/Framework, and modern web technologies. Proven expertise in clean architecture, performance optimization, and implementing secure solutions. Strong foundation in both frontend and backend development with keen interest in cybersecurity and emerging technologies.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET Core, .NET 8, Web API, React, Node.js, Express, Laravel, Bootstrap

Databases: MSSQL, MySQL, Entity Framework

Development Tools: Azure DevOps, GitHub, Jira

Testing Tools: Manual Testing, API Testing (Postman), Performance Testing (JMeter), Burp Suite, Owasp Zap

PROFESSIONAL EXPERIENCE

Jr.NET DEVELOPER

Glosix Systems

February 2026 – May 2026

- Assisted in developing .NET Core APIs and ReactJS UI components.
- Built and integrated third-party payment services using secure API connections.
- Gained hands-on experience with Entity Framework and SQL Server.
- Worked with senior developers to optimize performance, resolve issues, and implement solutions.
- Developed 2 full-stack applications including E-commerce, and SOC Dashboard
- Built apps using ASP.NET Core MVC, C#, SQL Server, Entity Framework Core
- Implemented JWT authentication and responsive frontends with React

SQA Engineer (Training)

NexGen Institute

July 2023 – October 2023

- Executed Black Box, Smoke, GUI, Functional, and Regression testing on web applications.
- Performed API testing via Postman and load/performance testing using JMeter.
- Manual & automated testing (Postman, JMeter, Cypress) & Security Testing (Burp Suite, Owasp Zap)

PROJECTS

• LOG EASE – SECURITY OPERATIONS CENTER (SOC) DASHBOARD

I developed a real-time Security Operations Center (SOC) monitoring dashboard with a dual-stack architecture: a .NET Core and ReactJS responsive interface, alongside a React.js platform powered by Node.js, Express.js, and socket.io for live WebSocket streaming with sub-500ms latency. The system integrates threat intelligence from VirusTotal, AbuseIPDB, and SIEM REST APIs for automatic IOC enrichment, employs the MITRE ATT&CK framework for tactical classification, and visualizes data using D3.js, Chart.js, and Leaflet.js including geographic heat maps and network topology diagrams for lateral movement analysis. It features comprehensive incident lifecycle management with SOAR automation, role-based access control across three user tiers with granular permissions, and automated PDF/CSV reporting. Following multi-layered security testing (Black Box, White Box, Integration) and clean OWASP ZAP vulnerability scans, the platform achieved 87% code coverage, is optimized for five concurrent users on MySQL, and is designed for deployment among Pakistani SMBs and emerging enterprises.

EDUCATION

Bachelor of Computer Science 2022 – 2026

University of Agriculture Faisalabad (Sub Campus Burewala)

INTERESTS & HOBBIES

- Cybersecurity & Network Security Analysis
- Continuous Learning & Professional Development
- Exploring New Technologies & Emerging Trends
- Programming & Software Development

CERTIFICATIONS & TRAINING

- Full Stack Development in Glosix Company in React and .Net Framework
- Google Cybersecurity Professional Certificate ----- Coursera
- Software Quality Assurance (SQA) Certification
- DigiSkills.pk Freelancing Training
- DigiSkills.pk Communication & Soft Skills Training
- DigiSkills.pk Entrepreneurship Training
- DigiSkills.pk Data Analytics and Business Intelligence
